Architect Reusable AI Agent Systems

Optimize Agentic AI: Algorithms for Peak Performance

Hybrid AI Search Workflows

Engineer & Explain AI Model Decisions

Optimize AI: Build Reusable Model Pipelines

Optimize Python for Agentic AI

Test and Secure Your AI Code

Secure AI: API and Dependency Risks

Secure Your AI: Threat Modeling

Design Ethical AI Rewards and Policies

Toni Gansel

has successfully completed the online Specialization

Agentic AI Development & Security

Now that you have completed the Agentic AI Development & Security Specialization, you stand out with comprehensive expertise in building secure, production-ready AI systems. This certificate demonstrates your ability to architect, optimize, test, and secure AI applications at enterprise scale. Throughout this program, you've gained proficiency in designing reusable AI agent architectures, optimizing algorithms for peak performance, implementing robust testing and CI/CD pipelines, securing APIs and managing dependencies, applying threat modeling and security controls, and designing ethical AI systems with validated reward functions. You're prepared to lead AI development initiatives with a security-first mindset.
